ABOUT ME

Computer Engineering graduate(2026) with hands-on experience in Java, Spring Boot, Hibernate, MySQL, and RESTful API development. Strong foundation in Object-Oriented Programming, database management, and backend application development. Familiar with React.js and modern web technologies for building full-stack applications. Skilled in developing scalable software solutions and solving complex technical problems.

SKILLS

Programming: Java, JavaScript, SQL,python

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Technologies: Spring Boot, Hibernate, RESTful APIs

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Maven

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, CRUD Operations, MVC Architecture, Database Design, Authentication & Authorization, Software Development Life Cycle (SDLC)

INTERNSHIP & EXPERIENCE

RoboKart– Gujarat

- Taught basic coding concepts to junior students
- Guided them with logic building, problem-solving, and simple programming tasks

PROJECTS

SAHYOG AI – AI-Powered Smart Society Management Platform [Link](#) [Github](#)

Tech Stack: React.js, Spring Boot, MySQL, Gemini API

- Developed an AI-powered society management platform for residents and administrators.
- Implemented complaint management, notices, events, and resident communication modules.
- Built RESTful APIs and integrated MySQL for efficient and secure data management.

ARTHA AI –AI Powered Personal Finance Management Platform [Link](#) [Github](#)

Tech Stack: React.js, Spring Boot, MySQL, Gemini API

- Developed an AI-powered personal finance platform using React.js and Spring Boot.
- Integrated Gemini API to provide financial insights, spending analysis, and personalized recommendations.
- Designed RESTful APIs and MySQL database architecture for secure and efficient data management.

MERCHANTPAY – Full Stack Payment Management System

[Link](#) [Github](#)

Tech Stack: React.js, Spring Boot, MySQL

- Developed a full-stack payment management system using React.js, Spring Boot, and MySQL.
- Implemented RESTful APIs for payment processing, transaction tracking, and merchant management.
- Built responsive frontend interfaces and optimized database operations for efficient performance.

EDUCATION

Mumbai University | 2023-2026

Bachelors in Computer Engineering

- CGPA: 7.7

HSC | 2021-2022

science

SSC | 2019-2020

- Percentage: 94%

CERTIFICATE

- **Web Design & Development – NSDC | Skill India Digital Hub**
- **NSS Volunteer (2 Years) – Participated in social awareness, community service, and college initiatives.**
